Remote Access from SmartPhone (Divis)

In order to view the camera system from your iPhone/iPad/Droid you will need to install a free App called Divis DVR Viewer. This can be found in the App Store by searching for "Divis". Once installed you will need to set up your camera sites, please follow instructions below:

- 1) Under Site List select Add Site**

Site Name: (Identifying Name)

Address: (URL)

Channel: (# of cameras you have)

Port: 3000

Username:

Password:

2) Hit Settings button in top left corner

3) Under Site Connection Mode select Single and then select the Site Name that you just entered (this might be automatically entered into space)

4) The Login should be "Off" at the top

5) Select Done in the top left corner to view the camera

Remote Access from SmartPhone (ATOM8)
